

Nguyen Ngoc Thien An

 github.com/NguyenAn-1703  an.com  nguyenan21062005ne@gmail.com

EDUCATION

SaiGon University

B.S. Software Engineering

September 2028

Current GPA: 3.73/4.0

Can Duoc High School (Dual Enrollment at Mission Community College)

September 2023

Score: 9.0/10.0

COURSEWORK

Courses: Object-Oriented Programming, Data Structures and Algorithms, Discrete Mathematics

SKILLS

Languages: Java, PHP, JavaScript/TypeScript, HTML/CSS

Tools: Git/GitHub, VS Code, IntelliJ

PROJECTS

Online Quiz Management System | *React, Laravel, MySQL, VS Code*

April 2026

- Developed a web-based testing platform designed to streamline exam administration, allowing instructors to manage students by class/subject and generate customized quiz exams.
- Integrated strict anti-cheating mechanisms to monitor student behavior during testing, ensuring exam integrity and academic honesty.
- Built a secure role-based access control (RBAC) system for instructors and students, delivering instant feedback and automated grading upon exam submission.

Bookstore Management System | *JavaSwing, MySQL, VS Code*

March 2025

- Developed a robust desktop application to automate daily bookstore operations, including inventory tracking, dynamic product management, and sales transaction processing.
- Implemented a structured Three-Layer Architecture (Presentation, Business Logic, Data Access) to decouple core modules and ensure high system maintainability.
- Designed and integrated a secure role-based access control (RBAC) mechanism to differentiate permissions between administrative staff and cashiers.

Smart Restaurant & QR Ordering System | *React, NestJS, PostgreSQL, VS Code*

March 2025

- Developed a full-stack smart restaurant application enabling customers to scan table-specific QR codes to access dynamic web menus and place direct orders.
- Built an interactive backend dashboard for kitchen staff and chefs to instantly receive, track, and manage order lifecycles, reducing preparation delays and order errors.
- Optimized database queries and structured relational data in PostgreSQL to ensure real-time status updates between the dining tables and the kitchen system.

EXPERIENCE

High School Programming Innovation Contest | *Participant*

October. 2021

Participated in a district-level programming innovation contest, developing creative programming solutions.

HOBBIES

Drawing

2020 – 2024

Drawing landscapes and portraits

Playing guitar

2022 – 2025

Playing acoustic guitar and practicing basic songs and melodies
